Work Experience

[VOICEplug AI](#) | Frontend Engineer

June 2025 - Present

- Owns end-to-end frontend development of the Customer Success Portal (2K+ live users, including franchise owners and management teams at Cicis Pizza, GoodCents, Rusty's Pizza and Olga's Kitchen) from design implementation to deployment and ongoing support.
- Delivered 10+ production-ready modules (reports, dashboards, subscription, user management, authentication flows) using React, TypeScript, Vite, Tailwind and Highcharts Core, enabling leadership to track sales, orders, menu, upsell, calls and customer trends in real time.
- Partnered with leadership(CTO, Director of Products, Senior PMs, Principle Engineer) and cross-functional teams(Backend and QA Team) to ship secure, scalable and high-performance features — implementing role-based access, reducing chart re-renders & load times by ~70%, and ensuring smooth cross-device operations from Mobile to Desktop.

[Codewalla Software Development](#) | Software Development Engineer

June 2023 - February 2025

- Developed scalable web applications using React.js, JavaScript, TypeScript, HTML, CSS, Sass, Redux and MUI, optimizing performance with memoization, lazy loading and virtualization to reduce re-render times by 50%.
- Integrated complex REST APIs and enhanced API efficiency by 15%, leveraging Webpack and Babel for optimized bundling and ES6+ compatibility.
- Enhanced web performance and accessibility by applying Google Lighthouse/PageSpeed Insights best practices (70% faster load times) and aligning with WCAG standards through semantic HTML, ARIA roles, and screen reader support.
- Led peer code reviews, debugging sessions and cross-browser compatibility testing, while mentoring junior engineers and enforcing frontend best practices, resulting in a 3x improvement in team code quality.
- Collaborated with cross-functional teams to design and build efficient backend APIs using Node.js and MongoDB, reducing latency and achieving 15% faster data transactions.

[CrowdAnalytix](#) | Frontend Engineer Intern

March 2023 - June 2023

- Built responsive user-facing features in React, achieving a 40% increase in user engagement and 25% faster page loads.
- Translated Figma designs into pixel-perfect, responsive and reusable React components.

Skills

Frontend Technologies: React.js, Redux, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, CSS preprocessors (SASS).

State Management & Performance: Redux Toolkit, Context API, React Query, Lazy Loading, Memoization.

Development Tools: Git, GitHub, VS Code, Jira.

Projects

Food Delivery App (React.js, JavaScript, Context API, HTML/CSS)

March 2025

[Github](#) | [Live](#)

- Built a scalable food delivery platform using React.js and JavaScript, implementing Context API for state management, lazy loading for 40% faster performance, and responsive UI with CSS and Flexbox for a mobile-friendly user experience.
- Improved component reusability and reduced redundant code by 35%, enhancing maintainability and scalability.

Portfolio Website (Next.js, Tailwind CSS, Framer Motion, Radix UI, React Icons, Swiper)

August 2024

[Github](#) | [Live](#)

- Architected a personal portfolio with 30+ reusable, type-safe components in Next.js + TypeScript, improving scalability and cutting feature rollout time by 25%.
- Achieved 30% faster page load times and 100% mobile responsiveness using Tailwind CSS, Framer Motion, and performance-focused design practices.

Education

B.Tech in Computer Science Engineering

August 2019 - May 2023

Lovely Professional University, Punjab | CGPA - 7.9/10

Achievements

- Earned 8+ badges on LeetCode for solving problems consistently for 100+ days in 2023, ranking in the top 4.2% of users.
- Solved 300+ DSA coding problems, across various platforms (e.g., [LeetCode](#), GFG, Coding Ninjas, etc.).

Certification

- The Complete 2023 Web Development Bootcamp - [Udemy](#)
- React and Redux - [CipherSchools](#)
